

Assignment-3

- 1) Create the following with whatever visualizations you have built in assignment-1 & 2(if you want you can also create new visualizations)
 - Dashboard
 - story
- 2) Publish the dashboard & story on to tableau public server

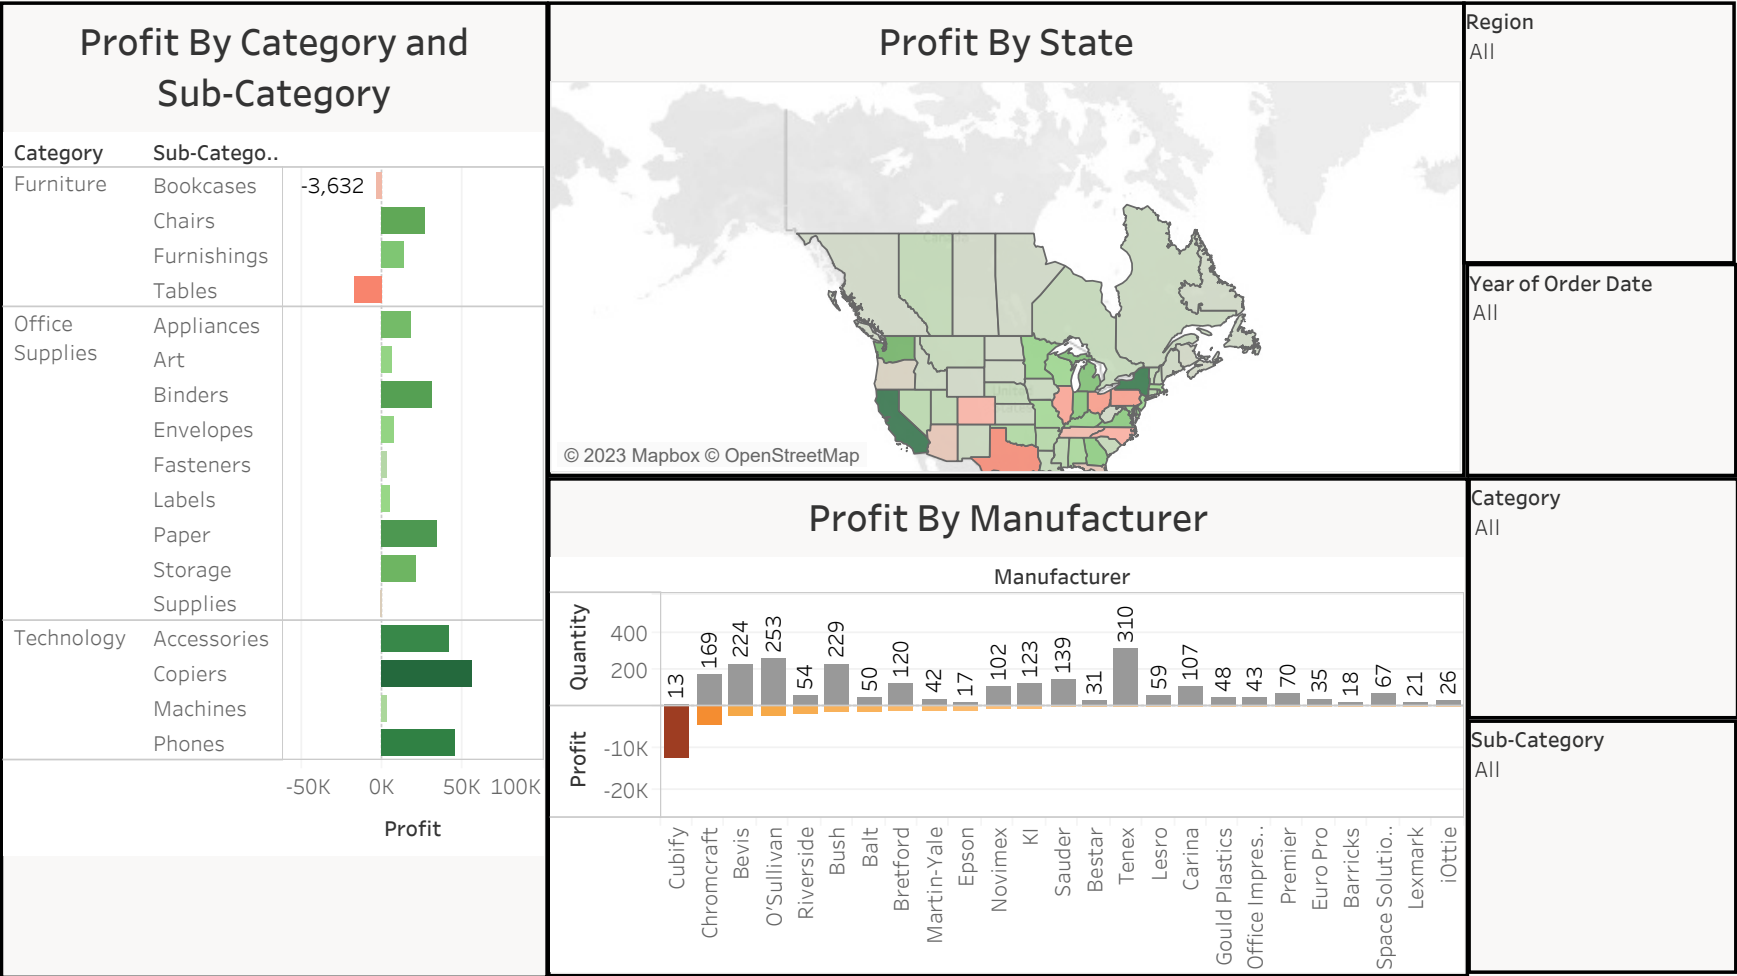

Dashboard in tableau public server:

https://public.tableau.com/app/profile/rohit.n5087/viz/20BCD7097_Assignment-3/Assignment-3?publish=yes

Story in tableau public server:

https://public.tableau.com/app/profile/rohit.n5087/viz/20BCD7097_Assignment-3_Story/Story1?publish=yes

1) Profit by Category and Sub-Category:

This visualization explores the profit breakdown by categories and sub-categories of products. The bar chart below showcases the profit values for each category, with color coding to distinguish the sub-categories.

2) Profit by State:

In this visualization, we examine the profit distribution across different states in the United States. The choropleth map below displays the profit values, with darker shades representing higher profits.

3) Profit and Quantity by Manufacturer:

In this visualization, we examine the relationship between the sum of profit and the sum of quantity for each manufacturer. The bar chart below showcases the total profit and total quantity values att..

Insights:

- 1) California stands out as the most profitable state, with a significant concentration of sales. On the other hand, states like Wyoming and North Dakota show lower profit values.
- 2) Technology products yield the highest profits, driven by strong sales in sub-categories like Phones and Accessories. Furniture category has the lowest profitability, with Tables and Bookcases being the least profitable sub-categories.

Conclusion

Through this analysis of the sample-superstore dataset, we discovered significant variations in profit across different dimensions. Understanding the profitability by state, category and sub-category, as well as manufacturer, can help make informed business decisions...
